Implementation Guidance on the Accounting for the Disposal of General Property, Plant, & Equipment

Federal Financial Accounting Technical Release

Technical Release 14

July XX, 2011

Draft for Review
The Secretary of the Treasury, the Director of the Office of Management and Budget (OMB), and the Comptroller General, established the Federal Accounting Standards Advisory Board (FASAB or “the Board) in October 1990. FASAB is responsible for promulgating accounting standards for the United States Government. These standards are recognized as generally accepted accounting principles (GAAP) for the Federal Government.

Section III. I (3) of FASAB’s Rules of Procedure authorizes the AAPC to issue technical releases related to existing federal accounting standards. Technical releases are intended to provide guidance on the specific application of Statements of Federal Financial Accounting Standards (SFFASs), Interpretations of SFFASs, and Technical Bulletins. AAPC’s technical releases are in the third category of authoritative guidance in the Federal GAAP hierarchy as stated in the SFFAS 34, The Hierarchy of Generally Accepted Accounting Principles. AAPC may not amend existing standards or promulgate new standards.

Additional background information is available from the FASAB or its website:

♦ “Memorandum of Understanding among the Government Accountability Office, the Department of the Treasury, and the Office of Management and Budget, on Federal Government Accounting Standards and a Federal Accounting Standards Advisory Board.”

This is a work of the U.S. government and is not subject to copyright protection in the United States. It may be reproduced and distributed in its entirety without further permission from FASAB. However, because this work may contain copyrighted images or other material, permission from the copyright holder may be necessary if you wish to reproduce this material separately.
The Accounting and Auditing Policy Committee (AAPC) was organized in May 1997 by the Department of the Treasury, the Office of Management and Budget (OMB), the Government Accountability Office (GAO), the Chief Financial Officers’ Council (CFOC), and the Council of the Inspectors General on Integrity and Efficiency (CIGIE) [formally the President's Council on Integrity and Efficiency (PCIE)], as a body to research accounting and auditing issues requiring guidance.

The AAPC serves as a permanent committee established by the Federal Accounting Standards Advisory Board (FASAB). The mission of the FASAB is to develop accounting standards after considering the financial and budgetary information needs of congressional oversight groups, executive agencies, and the needs of other users of Federal financial information. The mission of the AAPC is to assist the Federal government in improving financial reporting through the timely identification, discussion, and recommendation of solutions to accounting and auditing issues as they relate to the specific application of existing authoritative literature.

The AAPC is intended to address issues that arise in implementation, which are not specifically or fully discussed in Federal accounting and auditing standards. The AAPC's guidance is cleared by FASAB before being published.

Additional background information on the AAPC is available from the FASAB or its website:

Introduction

Purpose

1. Statement of Federal Financial Accounting Standards (SFFAS) 6 (paragraphs 38 and 39) outlines the requirements for the disposal, retirement, or removal from service of general property, plant, and equipment (G-PP&E). SFFAS 6 (paragraphs 97 and 98) outlines the requirements for recognition and measurement of disposal related cleanup costs. The Accounting and Auditing Policy Committee (AAPC) G-PP&E Disposal subgroup requested implementation guidance to clarify existing guidance contained in SFFAS 6 regarding the disposal, retirement, or removal from service of G-PP&E. Many question whether the existing guidance applies to temporary removal from service of G-PP&E assets. For example, SFFAS 6 does not provide guidance regarding G-PP&E returned to service following temporary removal from service such as whether the valuation should be restored to acquisition cost or remain at net realizable value. Uncertainty regarding the application of SFFAS 6 provisions to G-PP&E temporarily removed from service as well as uncertainty in determining when removal is permanent contributes to inconsistencies in interpretation and implementation of the standard.

2. Implementation guidance is needed to recognize the many complexities involved in disposal of G-PP&E and should delineate events that trigger discontinuation of depreciation and removal of G-PP&E from accounting records. The purpose of this technical release is to provide implementation guidance that further clarifies the requirements stated in the above noted SFFAS 6 paragraphs.

Scope

3. Readers of this technical release should first refer to the hierarchy of accounting standards in SFFAS 34, The Hierarchy of Generally Accepted Accounting Principles. This technical release supplements the relevant accounting standards, but is not a substitute for and does not take precedence over the standards. This technical release clarifies, but does not change, guidance previously provided in SFFAS 6 Accounting for Property, Plant, and Equipment.

Effective Date

4. This technical release is effective immediately.
Technical Guidance

SFFAS 6: Disposal of G-PP&E

5. In accordance with SFFAS 6, Accounting for Property, Plant, and Equipment, paragraph 38, “in the period of disposal, retirement, or removal from service, G-PP&E shall be removed from the asset accounts along with associated accumulated depreciation/amortization.”

Further, paragraph 39 states that:

“G-PP&E shall be removed from G-PP&E accounts along with associated accumulated depreciation/amortization, if prior to disposal, retirement or removal from service, it no longer provides service in the operations of the entity. This either could be because it has suffered damage, becomes obsolete in advance of expectations, or is identified as excess. It shall be recorded in an appropriate asset account at its expected net realizable value. Any difference in the book value of the PP&E and its expected net realizable value shall be recognized as a gain or a loss in the period of adjustment. The expected net realizable value shall be adjusted at the end of each accounting period and any further adjustments in value recognized as a gain or a loss. However, no additional depreciation/amortization shall be taken once such assets are removed from G-PP&E in anticipation of disposal, retirement, or removal from service.”

SFFAS 6: Recognition of Cleanup Costs Associated with Disposal of G-PP&E

6. Additionally, SFFAS 6 provides requirements for recognition and measurement of disposal related cleanup costs. In accordance with paragraphs 97 and 98:

“A portion of estimated total cleanup costs shall be recognized as expense during each period that GPP&E is in operation. This shall be accomplished in a systematic and rational manner based on use of the physical capacity of the associated PP&E (e.g., expected usable landfill area) whenever possible. If physical capacity is not applicable or estimable, the estimated useful life of the associated PP&E may serve as the basis for systematic and rational recognition of expense and accumulation of the liability.

“Recognition of the expense and accumulation of the liability shall begin on the date that the PP&E is placed into service, continue in each period that operation continues, and be completed when the PP&E ceases operation.”

1 Please see Appendix D: Glossary for definitions of obsolete, excess and net realizable value.
Temporary vs. Permanent Removal from Service

7. The following section provides further clarification and guidance to the requirements stated in SFFAS 6, paragraphs 38, 39, 97, and 98 as it relates to “removal from service.” Also in those paragraphs the terms “disposal” and “retirement” are used and are intended to be permanent in nature. However, “removal from service” may be permanent or temporary. The paragraph below defines the term “removal from service,” as referenced in SFFAS 6, and further discusses the differences between temporary and permanent removal from service.

8. “Removal from service”\(^2\) is defined as an event that terminates the use of a G-PP&E asset (e.g., shut down of a facility). Removal from service may occur because of a change in the manner or duration of use, change in technology or obsolescence, damage by natural disaster, or excess to entity’s mission needs. The removal from service should be considered temporary, unless there is evidence of management’s documented decision to permanently remove the asset from service and the asset’s use is terminated.\(^3\) Permanent removal from service is evident from management’s documented decision to dispose of an asset by selling, scrapping, recycling, donating or demolishing the asset. Agencies should include in their policies and procedures required documentation for the permanent removal from service of an asset.

9. Management’s decision to remove from service is evidenced by the actions taken in accordance with the entity’s policies and procedures to commence the retirement and/or disposal process. Temporary removal from service is evidenced by activities such as continuing low-level maintenance to sustain the asset in a recoverable status or until reutilization efforts are exhausted. For example, processing an aircraft or idling a facility in such a way as to retain the potential for its future operability would be persuasive evidence of intent to preserve an option to return the asset to service if warranted by evolving mission requirements.

10. Two business events are necessary for the permanent removal from service:

   1. Asset’s use is terminated, and

   2. There is evidence of management’s documented decision to permanently remove the asset from service.

---

\(^2\) The term “removal from service” does not include the “out grant” of an asset. “Out grant” is defined as interest or right granted to another entity to use government property by a lease, easement, license, or permit. Therefore, “removal from service” as defined in this document does not apply to out granted assets, because the government retains its ownership in the property and only the use of the property is given to the entity using the out granted asset.

\(^3\) The agency’s management may elect to identify and/or classify the operational status of assets to include those temporarily removed from service in the property accountability system.
If only one of the two business events has occurred, permanent removal from service has not occurred (i.e., considered temporary removal) and there is no change in the G-PP&E reported value and depreciation continues.

Likewise, in the case of G-PP&E cleanup costs, if only one of the two business events has occurred, permanent removal from service has not occurred (i.e., considered temporary removal) and, any cleanup costs associated with disposal, closure, and/or shutdown should continue to accumulate as a liability in accordance with SFFAS 6, paragraphs 97 and 98.

Financial Transactions

11. The following section describes the financial transactions that result from permanent removal, retirement, and/or disposal of G-PP&E. No disposal related entries are recognized prior to permanent removal from service.

12. **G-PP&E Acquisition Cost & Depreciation at Permanent Removal** - When the entity’s management decides to permanently remove, retire, and/or dispose of an asset from service and the asset’s use is terminated, the asset’s acquisition cost and associated accumulated depreciation are removed from the G-PP&E account and the asset is recorded at its net realizable value with an offsetting entry to unrealized gain or loss. Upon completion of the disposal of the asset, the entity should write off the asset from its financial records. Any difference between the expected net realizable value of the G-PP&E previously recorded and the actual realized disposition amount should be recognized as a realized gain or loss.

13. **Spare Parts and Subcomponents** - If during the permanent removal process, the asset is dissembled and spare parts or sub-components are salvaged to be used for other purposes, the spare parts or sub-components should be recorded as new and separate assets in accordance with SFFAS 6 or SFFAS 3, *Accounting for Inventory and Related Property*.

14. **G-PP&E Acquisition Cost & Depreciation at Temporary Removal** - If the asset’s normal use is terminated but management has not decided to permanently remove the asset from service, the asset’s removal is considered temporary. In this case, there is no change in the G-PP&E reported value and depreciation continues. Likewise, if the asset is still in use even though management has decided to permanently remove, retire and/or dispose of the asset, the permanent removal from service has not occurred. There is also no change in the G-PP&E reported value and depreciation continues.

---

4 Refer to Appendix B: Table 1: Scenarios I & II, Step 2 for account transactions.
5 Refer to Appendix B: Table 1, Scenario I, Step 1.
6 Refer to Appendix B: Table 1, Scenario II, Step 1.
15. **G-PP&E Cleanup Costs** - For assets permanently removed from service, any unallocated/unamortized portion of the total cleanup cost estimate associated with the disposal, closure, and/or shutdown of the G-PP&E should be recognized in full. If removal from service is considered temporary, the liability and associated clean up cost expense shall continue to accumulate.\(^7\)

16. **G-PP&E Disposal When Group or Composite Depreciation is Used** - For assets recognized using a group or composite method of depreciation, accounting transactions required to recognize the permanent removal of assets, as described in paragraph 11, will apply only when the entire group has been permanently removed from service. However, if an asset within the group is permanently removed, retired, and/or disposed while other assets in the group have not, the G-PP&E account is credited for the original cost of the removed asset less any salvage value, and accumulated depreciation is debited for the difference. Under the group or composite depreciation methods, no unrealized or realized gain or loss is recognized on the sale of an asset within the group prior to removal of the other assets in the group. The pro rata share of the total original group cost may be used to determine the cost of an asset within the group.

17. Table 1 in Appendix B illustrates two different scenarios, associated business events, and derived financial transactions to assist in interpretation and application of the guidance described in paragraphs 11 - 15.

---

\(^7\) SFFAS 6, paragraph 85: Cleanup costs are the costs of removing, containing, and/or disposing of (1) hazardous waste from property, or (2) material and/or property that consists of hazardous waste at permanent or temporary closure or shutdown of associated PP&E.

\(^8\) Regardless of when cleanup is executed, at temporary or permanent shut down, as cleanup costs are paid, payments shall be recognized as a reduction in the liability for cleanup costs. (SFFAS 6, paragraph 100)
The provisions of this Technical Release need not be applied to immaterial items.
Appendix A: Basis for Conclusions

A1. In January 2008, the Accounting and Audit Policy Committee established the General Property, Plant, & Equipment (G-PP&E) task force to assist in developing implementation guidance for federal G-PP&E as it relates to SFFAS 6, Accounting for PP&E, SFFAS 23, Eliminating the Category National Defense Property Plant, & Equipment, and other related G-PP&E Guidance developed by the FASAB. The task force included federal agency representatives who were experiencing G-PP&E implementation issues and those who have G-PP&E implementation best practices to share with the federal community.

A2. The G-PP&E task force was divided into four subgroups that addressed a set of related issues. The subgroups met separately on a regular basis to discuss their set of issues and reported back to the full task force on its progress towards the development of implementation guidance. The four sub-groups were:

- G-PP&E Acquisition
- G-PP&E Use
- G-PP&E Disposal
- G-PP&E Records Retention

A3. This guidance was developed by the Disposal subgroup. The subgroup included members from the following federal agencies:

- Department of Defense
- Department of Energy
- Department of the Interior
- Government Accountability Office
- General Services Administration
- National Aeronautics and Space Administration

The subgroup included accountants, program managers, and functional PP&E experts. The program managers gave the subgroup the perspective of how the standards come into play on a day-to-day basis.

A4. The scope of the implementation guidance is to address G-PP&E disposal as it applies to SFFAS 6. The guide focuses on when G-PP&E is disposed, retired, or removed from service.

A5. This implementation guide provides steps that can be followed to help federal entities consistently apply existing standards to assist in providing consistent, accurate and meaningful information.

A6. In reaching its conclusions, the subgroup deemed significant the unanimous agreement of its members that SFFAS 6 as currently written does not define temporary removal from service of G-PP&E assets and does not offer guidance regarding G-PP&E returned to service following temporary removal. This contributes to inconsistencies in interpretation and implementation of the
Appendix A: Basis for Conclusions

Guidance. The subgroup members presented numerous compelling examples of misinterpretation, confusion, and inefficient implementation. The subgroup was convinced that guidance is needed to clarify when G-PP&E has been removed from service and SFFAS 6 provisions apply.

A7. Additionally, subgroup members universally felt strongly that the implementation guidance should consider the cost vs. benefits of the many complexities involved in G-PP&E disposal, retirement, or removal from service and recognize the potential for reversing disposal decisions as mission requirements change. Therefore, the subgroup members decided to focus on defining temporary vs. permanent removal from service and ultimately continuing to depreciate and report assets as GPP&E that are temporarily removed from service. The following reasons were discussed:

a. Depreciation is a method of allocating the cost of the asset to those periods expected to benefit from use of the asset. When assets are temporarily removed from service, there is a great possibility of returning the assets to service; therefore management continues to maintain the assets in a mission ready status and the assets are available for use. Given this, the entity should continue depreciating its assets.

b. The subgroup members determined that the complexity and cost of continually suspending and reinstating depreciation for assets temporarily removed from service outweighs the benefits. Further, SFFAS 6 does not provide guidance for the recognition of assets returned to service following temporarily removal which implies that the standards address permanent removal.

c. Current guidance requires depreciation to be captured until the asset is either fully depreciated or permanently removed from service. In the case where an entity depreciates its assets costs based on actual usage or production, the depreciation expense for the entity would stop when the asset is not in use. For example, an agency can decide to use a depreciation method, such as flying hours, that would account for an asset’s ‘lack of activity.’

d. Changes in value or useful lives of assets remaining in service regardless of the reason (e.g. impairment) are outside of the scope of this document.

A8. The benefits of this guidance are: (1) it enables federal entities to interpret existing guidance and facilitates comparable implementation of federal accounting standards; and (2) it supports several federal financial reporting objectives, to include ensuring that transactions involving G-PP&E are recorded in accordance with federal accounting standards; the government’s net financial position is accurate; and the assessment of the performance of agencies in managing the cost and disposition of federal assets is supported.

A9. As part of the implementation of this guide and associated SFFAS 6, the federal agencies may incur additional costs to: (1) review and adjust the expected net realizable value at the end of each accounting period and any further adjustments in value recognized as a gain or a loss; (2) periodically review the status of those assets temporarily removed from service to determine if any changes in status or actions would trigger a change in G-PP&E recognition; and
Appendix A: Basis for Conclusions

(3) demonstrate and support management’s intent to retain an asset for future use or permanently dispose of the asset and any associated financial transactions, when applicable.

A10. The guidance defines “Removal from service” as an event that terminates the use of a G-PP&E asset (e.g., shut down of a facility). Management’s decision to remove from service is evidenced by the actions taken in accordance with the entity’s policies and procedures to commence the retirement and/or disposal process. Permanent removal from service is evident from management’s documented decision to dispose of an asset by selling (including selling the asset to another entity for use as its original intended purpose), scrapping, recycling, donating or demolishing the asset. Removal from service may occur because of a change in the manner or duration of use, change in technology or obsolescence, damage by natural disaster, or excess to entity’s mission needs.

A11. Eighteen letters were received from the following sources:

<table>
<thead>
<tr>
<th></th>
<th>FEDERAL (Internal)</th>
<th>NON-FEDERAL (External)</th>

<td></td>
</tr>
</tbody>
</table>

A12. Respondents were primarily supportive of the implementation guidance. Some respondents provided editorial suggestions and many were adopted. One respondent expressed the view that introduction of two key terms - temporary and permanent removal from service – which bifurcate the principles established in SFFAS 6 is inappropriate in a technical release. The AAPC believes that temporary removal from service is not addressed by SFFAS 6 because the standards are incomplete regarding such temporary status. Clarification regarding this matter is needed and provided through this technical release.
Appendix B: Illustrations

Table 1: Disposal, Retirement, Removal Business Events & Financial Transactions

Table 1 below illustrates two different scenarios, associated business events, and derived financial transactions to assist in interpretation and application of the guidance described in paragraphs 11 - 15. Further, it demonstrates that both business events (steps 1 and 2) must be in place to trigger a disposal financial transaction in accordance with SFFAS 6.

**Implementation Guidance on the Accounting for the Disposal of G-PP&E**

**Draft for Review**

May 12, 2011
Appendix B: Illustrations

Example of Practice

B1. The example of practice shown in the following table is for illustrative purposes only. The explanations and illustrations are presented to show how the standards may be applied but are not standards themselves. These illustrations are general in nature and may not apply to specific cases that appear similar but have unique circumstances.

B2. The table illustrates a federal entity’s various actions that may be considered as evidence of its management’s decision to either permanently remove, retire, and/or dispose of the asset or to retain the asset for future use (i.e., temporary removal from service).

B3. A federal entity would normally categorize its assets that have been removed from service (i.e., use has been terminated) into one of the following three categories:
   - retain asset for future use,
   - set aside for future disposal, or
   - imminent planned disposal.

B4. A federal entity would normally maintain and account for its G-PP&E in accordance with SFFAS 6 as well as the requirements for each category as established by the entity’s policies and procedures. The following table outlines the processes the entity may undertake when preparing its G-PP&E for assignment to each of the categories. The actions outlined for categories 2 and 3 may be used as evidence of management’s decision to permanently remove the asset from service, terminate its use and dispose of the asset. Once management’s decision is identified, using scenarios in Table 1, the relevant financial transactions can be determined and recorded.
### Table 2: Illustrations of Management’s Actions Demonstrating Decision for Temporary or Permanent Removal/Retirement/Disposal When the G-PP&E is Not in Use

#### Management

- Declare and report as “Vacant”
  - X
- Declare and report as “Excess”
  - X
- Expend maintenance, sustainment, and repair funds as needed to maintain a watertight asset
  - X
- Conduct assessment to identify environmental issues
  - X
- Complete required disposal documentation
  - X

#### Maintenance

- Maintain utilities in acceptable condition (i.e., fully functioning)
  - X
- Winterize plumbing (if required by local weather conditions)
  - X
- Conduct sufficient grounds maintenance to preclude unsightliness
  - X
- Maintain security to prevent vandalism and unauthorized use
  - X
- Retain equipment and spare parts\(^{10}\) on asset
  - X
- Install equipment and conduct maintenance
  - X

---

\(^{10}\) Examples of spare parts may include mechanical & electrical repair parts, electronic spares, maintenance assistance modules, and ready service spares.
